Summary

I'm a highly motivated with 3+ years of experience Full-Stack (**Python/Django/Laravel**) & (**Angular/React/Ionic**) in developing the web application, and have proven to be an asset for my clients. I deliver perfect results, meet deadlines, follow instructions, show daily progress. I always create proper backups and create a dev environment, and use GIT and migration services for any new update. You don't need to micromanage me. And you would not lose any of your valuable data.

I can take ownership, help others, always be learning, and apply my existing skill set to new challenges as we all continue to master the art of software development.
